

ISSUED BY THE GOVERNMENT OF THE PROVINCE OF ALBERTA FOR THE INFORMATION OF
THE PEOPLE OF THE PROVINCE.

SALES AGENCY IS CREATED BY ALBERTA POOL

Calgary, Alberta.—The establishment of a provincial selling agency, which would operate a seat on the Winnipeg Grain Exchange for selling and hedging purposes, was announced officially by the Alberta Wheat Pool Thursday, August 27. The agency will handle sales of the 1931 Alberta crop and is now in operation.

H. D. Purdy, general manager of the Alberta Wheat Pool, will head the selling department which will operate independently of the Central agency which in the past has had charge of disposition of all prairie grain. The Central selling agency will continue to operate under John I. McFarland until the 1930 crop is sold entirely.

The alteration of the Alberta system, said Mr. Purdy, will not affect any arrangements announced by provincial and Federal governments, and the selling agency will be a department of the Alberta Wheat Pool. Farmers could still sell their wheat at the pool elevator and receive the open market price of they could accept the initial pool payment of 35 cents a bushel and receive additional payments later. The five-cent per bushel bonus allowed by the Federal Government as a relief measure for farmers would be payable on delivery, whether the farmer sold on pool basis or took the open market price.

All grain received by the Alberta selling department would be disposed of through regular market channels, he said.

Junkers Freight Plane

Big Plane Will Be Used For Freight Cargoes In West

Montreal, Que.—Destiny to carry freight cargoes in northwestern Canada, a huge all-metal Junkers freight plane, has been purchased by Canadian Airways and will be shipped to the northwest within a few months, it was announced here.

The new Junkers JU-52, a development of the trans-Atlantic "plane," will be the largest freight plane in Canada. Fully loaded, it weighs four tons, and the cargo space is 1,563 miles. The big plane can be landed at about 47 miles an hour.

Will Attend Conference

Mahatma Gandhi Leaves For London

Simla, India.—After months of indecision and "heart-searching," Mahatma Gandhi has announced his intention to attend the second round table conference at London.

At the end of almost three hours' conversation with Viscount Earl Willington, who left a sick bed to see him, Gandhi agreed to accept the conference with the round table conference.

His decision was based on an attitude of "mutual accommodation and compromise." The Nationalist leader agreed to drop his demand for the appointment of an arbitration board to determine whether there have been breaches of the Delhi armistice and the viceroy consented to institute an inquiry into the alleged excesses of tax collectors in the Bardoli district.

Thus, after nearly 20 years' absence from England, Gandhi will set sail for London with Pandit Madan Mohan Malaviya and M. S. Sarojini, also delegates, and will reach his destination September 9. He will take aboard his goals to provide him with milk.

Defends Position

Hon. J. H. Thomas Says Nation's Interest Is Above Party

London, England.—In a letter to the executive committee of the Labour Party, Hon. J. H. Thomas defended himself for following Prime Minister MacDonald and joining the national government.

"I know my action will be misinterpreted," he said in the letter. "I know full well I should be subjected to criticism and abuse, but I also know the nation's interest, which is greater than that of any individual or party, was at stake."

Mr. Thomas explained he had abandoned no policy and sacrificed none of his principles. "My only policy," he said, "has been to face boldly the grave emergency in the nation's affairs, and I have decided to remain in the new government only as long as the crisis lasts, and until stability is assured."

He added that in the elections which were inevitable, he would "accept the result."

Good Crops At The Pas

Average Is Limited But Yield Reported Remarkably High

The Pas, Man.—Fully two weeks behind some sections of the southern prairie, the west, cutting operations started last week on wheat and oat fields here. While there is only a limited acreage in this part of the country, the yield has been remarkably high according to farmers in this district.

Oats have run as high as 50 bushels while wheat has averaged 30 and 35 bushels. This is the fifth consecutive year that grain yields have been good in this district and considerable interest is being taken in the possibility of throwing open the Carrot River valley to settlers.

This angle of rich river silt has produced sensational yields for years, but as yet, only squatters are working the land, as it is not open to homesteaders. The local Board of Trade has received enquiries from farmers in the southern part of Saskatchewan regarding the possibility of establishing mixed farming in that area.

Wheat Bonus

Winnipeg, Man.—Farmers are assured of the five-cent bonus on wheat pending arrangements now being made by the Board of Grain Commissioners, E. B. Ramsay, chairman of the board, stated here recently. Mr. Ramsay's attention had been drawn to a suggestion that farmers who have threshed wheat are withholding it from the market because the machinery for the distribution of the bonus had not yet been perfected.

Printing Plants Wrecked

Montreal, Que.—Hopelessly ruined by sabotage of the printing presses and the firing of the plant, the weekly newspapers Le Mortier, Le Chateau and Le Goglu will disappear from Montreal journalism, Joseph Menard, joint owner with Adrien Desjardins, said the fire commissioner's court heard at a hearing to probe circumstances surrounding the wrecking of the printing plant.

Had Stormy Trip

Southampton, England.—Owing to a violent storm in the English Channel, the Canadian Pacific liner "Empress of Britain" was unable to call at Southampton, Captain Latta said he had fought bad weather all the way across the Atlantic.

Historic Sites

Cairn Erected To Mark Landing Of General Wolfe

Sydney, N.S.—To the honored dead of two nations. This brief tribute, dropped by a squadron of Royal Canadian Air Force planes, soaring high overhead, epitomized the spirit and thoughts of over 3,200 people gathered on the rocky bluff overlooking Kingston Cove to witness the unveiling by Hon. Frank Standaert, Lieutenant-Governor of Nova Scotia, of the beautiful memorial cairn erected by the Historic Sites and Monuments Board of Canada, to mark permanently the site of Wolfe's landing in June 8, 1758, six weeks prior to the fall of Louisbourg.

Lieutenant-Governor Standaert pulled the cord unveiling the cairn which now permanently marks the site of Wolfe's hazardous undertaking. The recent advance of one and one-half cent a gallon in the gasoline price was scored by the Alberta directors as unwarranted. Copies of the resolution embodying the criticism are being sent to all motor associations in Manitoba, Saskatchewan and British Columbia, urging similar action to be taken.

Raise In Gasoline Prices

United Protest From Western Provinces Is Urged

Calgary, Alberta.—Efforts to bring united protest from all western provinces against increase in gasoline prices are being instituted here by directors of the Alberta Motor Association.

The recent advance of one and one-half cent a gallon in the gasoline price was scored by the Alberta directors as unwarranted. Copies of the resolution embodying the criticism are being sent to all motor associations in Manitoba, Saskatchewan and British Columbia, urging similar action to be taken.

RELIEF PLANS WILL EMBRACE PUBLIC WORKS

Ottawa, Ont.—Canada's Government is carefully considering a scheme to bring relief to the unemployed in the north.

The second section commences at the town of Schreiber, Thunder Bay district, and goes west to the Manitoba border, and hence westerly to North Bay. The second section commences at the town of Schreiber, Thunder Bay district, and goes west to the Manitoba border, and hence westerly to North Bay.

Dr. J. A. Riddick, Canadian's veteran dairy commissioner stated here that all Canadian dairy farmers can send their milk to the United Kingdom.

"The prospects for butter especially are very good," said Dr. Riddick, "Canadian cheese is also very popular and tops the market in its class."

Trans-Canada Highway

Locations Of Final Sections Of Road In Ontario Announced

Toronto, Ont.—Designation of first sections of the trans-Canada highway in Ontario was announced by Premier Geo. S. Henry following approval by the Ontario Highway Commission.

Two sections are designated in the plan. The first section extends from Toronto to the north in connection with Federal Government grants.

The second section commences at the town of Schreiber, Thunder Bay district, and goes west to the Manitoba border, and hence westerly to North Bay. The second section commences at the town of Schreiber, Thunder Bay district, and goes west to the Manitoba border, and hence westerly to North Bay.

Preparing To Send Goods To Australia

Good-Will Ship Will Leave Montreal Late In October

Toronto, Ont.—Preparations for the good-will ship "Empress of Britain" to leave for Australia are well advanced, according to a statement issued by J. E. Walsh, general manager of the Canadian Manufacturers' Association.

The "Empress of Britain," the Canadian liner, will leave Montreal for Australia October 25, bound for Australia. A similar trip by the same ship from Australia to Canada will precede the trip for which arrangements are now under way.

Details of the arrangement would, however, not be made public until Premier R. B. Bennett returns from western Canada and the recommendations are approved by the government.

Constant Vigilance Of British Authorities Is Necessary To Suppress Slave Trade In Africa

Those comfortable people who are wont to accept as gospel the glittering generalities of international orators and who, therefore, believe that all is well with the world apart from depression and failure to agree upon disarmament and war debts, may get something of a jolt if they peruse the reports of the recent annual meeting of the Anti-Slavery Society. They have been accustomed to believe that slavery was abolished in all countries with the exception of Liberia. But no less an authority than Mr. J. A. Sponder tells us that the menace of slavery is ever-present and that nothing but the constant vigilance and the restraining influence of British rule in the Sudan prevent its revival.

Only a year and a half ago there was a roundup throughout the Sudan by the British, which resulted in the rescue of a number of slaves, the capture of some notorious slave-traders and a further grip by the authorities upon the narrowing channels through which these had been operating. But, as Mr. Sponder points out, such round-ups are very expensive, and the Sudan treasury is in no state to stand any strain just now. That in a country as large as Europe slavery should have been virtually wiped out in thirty years is a sufficient tribute to the humanizing and civilizing influences of British rule; but there still remains all over the country a sort of subconscious acceptance of slavery that may not be wholly eliminated for generations. Primitive people are always drifting across the Sudan, and they all have this conception of slavery in their traditions and in their blood.

Even today comparatively few of the Sudanese or the Arabs regard slavery as a crime or an offence, but rather as something that must not be condoned and which must, therefore, be concealed or abandoned in toto. Virtually up to the end of 1900 the Sudan had been raided and devastated year after year for long generations by slave-raiders. The British changed that, but if their hands were now, slavery would be rampant in the Sudan. The British authorities in the Sudan do not adhere so strongly to their present policy and to decay interference by stay-at-home politicians whose knowledge of the facts is gleaned from fantasies or from a Cook's tour.

Want Lighter Bales

Popular Demand Is For Baled Hay That Is Easily Handled

The Seed Branch of the Dominion Department of Agriculture have received complaints from hay dealers that the present practice by Canadian farmers of putting up hay in bales to weights of 150 pounds or more is making the market for Canadian baled hay. Popular demand today is for a light bale that can be easily handled by the buyer, who in most cases is a farmer or truckman, who has to carry the bale on his shoulder to his feed lot. Bales weighing from 110 to 120 pounds will find a much more ready market than heavier bales.

Say It With Advertising
Speaking at a gathering in Montreal, L. J. McConna, member of a well-known firm said that advertising was "the lever by which many businesses had been raised to success." He is absolutely right in that statement as to "Say it with advertising" is quite as potent as to "Say it with words."

Cop-Hee, there don't jam up traffic. Why don't you use your noodle. Sweet Young Thing—I didn't know the car had one.

"And how are your two sons getting on?"
"Fine."
"In spite of the depression?"
"One's an official receiver and the other's a bailiff"—Brammer, Here.

W. N. U. 1805

Honor Indian Hero

Meshkioh, Ojibwa Brave and Indian guide attached to the French River Bungalow Camp, is as modest as he is courageous. It is three years since, with heavy odds against him, he rescued Miss Elfrida Osaman and Dr. J. Schwartz, of Chicago, from the clutches of the Blue Rapids on the French River into which they had been flung from an overturned canoe. He told not a word of his exploit which came at last to the notice of the Royal Canadian Mounted Police. Enquiries were set on foot, the facts came to light and the upshot was the presentation to Meshkioh this month at the French River Camp of the bronze medal for bravery of the Royal Humane Society. The presentation was made by the Indian Agent at a gathering of 120 people of the camp headed by Manager Jack Strathairn, at which the Chiefs of the tribe in full regalia of feather headdress and richly embroidered coats participated. Meshkioh (left, bareheaded), is shown in the photograph with the medal which is being awarded by an Ojibwa Chief.

Ten Year Plan For China

Would Convert China Into One Of The Great Industrial Powers Of The World

A "ten-year" plan for China, intended to accomplish much of what the Five-Year Plan is accomplishing for Russia, has been worked out by the Ministry of Industry.

The plan is intended to convert China into one of the great industrial powers of the world. The program has been submitted to the government. It embraces 14 points.

The scheme is of unprecedented magnitude and importance. If accepted in the form proposed, and if successfully carried out, the economic position of China will undergo a tremendous change. The plan is presented by the Ministry of Industries is worked out in great detail.

The plan is intended to convert China into one of the great industrial powers of the world. The program has been submitted to the government. It embraces 14 points.

Ontario Grapes

Growers Market Council To Launch Selling Campaign

Designed to promote sales of Ontario's grape crop, unusually large this year, a comprehensive selling and advertising campaign will be launched, according to Charles W. Bauer, secretary of the Ontario growers market council. "Every basket of grapes shipped outside the province will be subject to government inspection to ensure grade and quality," said Mr. Bauer. Ontario grapes should be available all over Canada, he said.

Water makes up 50 to 90 per cent. of growing plants.

Expect Good Crops Next Year

Conditions Favourable For 1932 Crop In Dried Out Areas

"With favourable moisture conditions it is quite possible that an exceptionally good crop may be grown next year in the districts badly dried out this year," says Dr. L. H. Kirk, who recently inspected the crops of the dried out areas of Saskatchewan, in company with Hon. Robert Weir, federal Minister of Agriculture, and J. G. Tugart, head of Swift Current Experimental Farm.

The general appearance of the dried out districts of the south of Saskatchewan is considerably improved, says Dr. Kirk, as a green carpet of Russian thistle covers the land. This is especially true of the better soil types.

As the land has been free from vegetation during the month of the summer, the soil is in the best condition for a good crop next year. The Russian thistle will hold any snow well and so give the moisture for germination.

The method for the farmer to follow in most places will be to burn off the Russian thistle in spring and seed the land which can be cheaply prepared by some form of surface cultivation without plowing.

There are limited areas so badly dried that the thistle has not been established. These are usually the lighter types of soil. A method which will be widely adopted is to seed the land during this month with winter rye in strips across the field. The intention of this will be to seed next spring with wheat.

France's active and reserve military forces comprise 15.4 per cent. of the population.

Greece Is Now Canada's Second Best Wheat Customer. With Importations Steadily Increasing

Reinder Farm At Churchill

Herd Of 1,000 Reindeer To Be Shipped North Next Spring

Negotiations are under way between a northern syndicate and an Alaska reindeer company for a herd of 1,000 reindeer to be delivered at Churchill next spring. The reindeer will be brought by boat to Vancouver and will be shipped across the continent to their new home about two miles north of the new bay port of Churchill. The chief business of the syndicate is expected to come from Europe. Reindeer can be shipped alive by the coal barge to Churchill much cheaper than cattle, and their meat is at a premium on the continent.

Cheap food is provided on the barren lands, the only cost will be three or four Eskimo herders. The rate of increase of these animals makes them among the most profitable stock to raise. The reindeer native to the area around Churchill are inferior to those of the north, but will be imported both in hides and skins. An attempt is being made to get federal aid for the project.

Good Musical Training

Broadens the Mind

Gives Wider Range Of Usefulness To Young People

Don't let the road drive away all attempt to teach the boys and girls something of the science of music. One evening about the piano with one musical girl playing real music and another young man singing the songs of real composers is a year of radio study in education and refinement. If our schools could confine themselves to reading, learning the fundamental rules of arithmetic, spelling and music, our children would be brighter, our churches more of song, our society more substantial, and our true music. Good training in music means a broadening of the mind. It gives to the fortunate scholar a wider range of usefulness. Even the child teaches its children how to sing.

Making More Butter

Butter Exports Continue to Show a Decided Increase

As the current year progresses the market report of the Dominion Dairy and Cold Storage Branch makes it increasingly apparent that butter fat is being sent to market in the form of butter to a greater extent this year than for some time past. Receipts at Montreal for butter up to August 15, this year, were 369,277 packages as compared with 242,983 packages the preceding year. Cheese receipts totalled 386,373 boxes for the same period as compared with 402,934 grammes, Hon. Howard McCoombs stated recently.

This will prevent any undue delay in the commencement of the relief projects and provision will be made later for having whatever amounts are expended recommended by the Federal Government, he said.

For Tourist Traffic

Link Up Highway To Connect Western National Parks

An effort to secure tourist traffic on trips around national parks in western Canada, via Hiding Mountain Park in Manitoba to Prince Albert National Park in Saskatchewan; then to Jasper National Park in Alberta, down to Banff, Waterton Lakes, Yellowstone and Glacier, will be made by the Federal Government. According to Hon. Thos. Murphy, all that was necessary before launching such an appeal was to complete a few links in all-weather highways.

Cramped His Style

A temperance organization in Kansas succeeded in getting a bootlegger jailed. The prisoner boasted the leader of the organization for iniquity. "You folks busted up the greatest temperance movement in this country for years," he said, "I was selling them fellows whiskey that was diluted as high as 75 per cent. and if you had left me alone another month I'd a had 'em drinking pure water."

Bergant, pointing wryly and after giving him instruction—"Now, don't forget, if anything moves you shoot." Sentry—"Yes, and if anything shoots I move."

Bookkeepers regard Italian bees as superior to the black German bees, because the Italian bees are better workers, swarm less, and are more gentle.

A woman never knows what a man thinks of her, although she thinks she does.

Greece today is Canada's second best wheat customer with importations of languages at the provincial normal school in Saskatchewan, and was assistant trade commissioner in Paris and Milan before going to Athens. He is at present touring the Dominion to gain first hand information on business conditions, and will return to Greece in November.

In an interview Mr. Turcott gave an outline of the conditions that exist in Greece and the opportunity for trade with Canada which is present. The trade commission office at Athens has been opened only for two years.

The general crisis has unquestionably reacted unfavourably on Greek economy and brought about a depression in commercial and other pursuits, said Mr. Turcott. But the depression can also be traced to a shortage of crops and to low prices obtained for the wheat crop of the previous year. However, it cannot be said that an actual crisis took place in Greece in 1930, nor that one is taking place this year.

"Taking into account the fall in prices, it is evident that the figures relating to the volume of Canadian exports to Greece showed a decided progress."

"This progress is attributable to our wheat having been shipped to the Greek market in a quantity never attained previously. Shipments of Canadian wheat to Greece represented, in 1930, a volume of 9,000,000 bushels, or over one-half of Greece's requirements of foreign wheat, against 7,000,000 bushels in 1929. Larger sales are reported this year."

The other Canadian products sold in the Greek market comprised tinned mackerel, tinned lobster, tinned salmon, tinned corn, tinned tomatoes, sauce, whiskey, agricultural implements and machinery, alongside walnuts and pine boughs.

To complete the picture of Canadian trade with Greece, I shall add that in 1930, our imports amounted to \$16,000 against \$25,000 in 1929, the balance of trade being therefore, slightly favourable in Canada.

To Hurry Relief Measures

Credit Of Province Of Saskatchewan Behind Relief Program

To enable the various projects of the province as soon as possible, the credit of the Province of Saskatchewan will be placed behind the whole relief program, Hon. Howard McCoombs stated recently.

This will prevent any undue delay in the commencement of the relief projects and provision will be made later for having whatever amounts are expended recommended by the Federal Government, he said.

Rights Or Duties

Perhaps one of the most potent causes of the present discontent is the tendency to lay stress on rights rather than duties. Yet the real progress of humanity probably depends far more on the conquest of the duty than on the conception of rights.

A case of a man who gave some of his blood to save his child, and at the same time unknowingly transmitted malaria to the child, has been reported.

One-tenth of the harvested hay crop in the United States is lost each year from spontaneous combustion.

About Town and Country

Hats from \$2.00 up. The date for Mrs. Gillespie's fall millinery opening will be given in a future issue of the News. Watch for the announcement.

Born—To Mr. and Mrs. H. O. LaBelle at Cereal hospital, on Monday, August 31, 1931, a son.

Mr. and Mrs. B. E. Kelly and children, accompanied by Paul Audibert, left last Friday morning for their home in Toronto. Mr. Kelly has been doing some inspection work in the west for the Bank of Toronto; and Mrs. Kelly has been visiting her parents Mr. and Mrs. T. Audibert.

Mrs. W. V. Miller and daughter Joan returned to Oyen last Monday from Wakaw, Sask., where they have been visiting Mr. and Mrs. G. A. Gosselin. Mr. Miller drove from Oyen to Wakaw to bring them home.

Mr. and Mrs. Robert Nisbet left yesterday morning for Calgary. After a residence here of several years (the wee Bob, being numbered among the pioneers of the district), they will be missed by a host of friends.

Mr. and Mrs. R. E. Gillespie were week end visitors in Medicine Hat, returning to Oyen Tuesday morning.

Mr. and Mrs. Robert McLaren and family who have been visiting in High River, returned to Oyen Monday evening.

Mr. Art Campbell, who recently left Oyen for Arden, Sask., has returned to the district and expects to open a barber shop and pool room in Sibbald.

Mr. H. L. Packard, who has been on the staff of the Bank of Toronto here for the last thirteen months, left last week to join the staff of the bank at Sietler.

Look at your address label!

All Saints W.A. will hold a sale of work and home cooking on Saturday, December 5.

Mrs. John Ozust, who has been visiting friends in North Dakota, and returned to Oyen the latter part of last week, left this morning to return to her home in Beaverlodge.

Mr. John Yake and children of Saskatoon, were district visitors last week, arriving Tuesday and leaving Saturday to return to their home.

Mrs. James Lees and family returned to Oyen this morning from Vancouver, where they have been spending a vacation.

Mr. W. S. Marshall and Mrs. J. Marshall, who were Calgary visitors last week, returned to Oyen Friday.

Mr. and Mrs. M. G. Whitlock and family returned to Oyen last Thursday, after visiting relatives in Dismore, Sask.

Hats from \$2.00 up. Watch for the date of Mrs. R. E. Gillespie's fall millinery opening which will be announced in a future issue of the News.

Looking to the Future

Robert Gardiner, M.P., president of the United Farmers of Alberta, says:

"Looking to the future I am confident that Alberta farmers will never be satisfied by any system of marketing that is not strictly co-operative in its basis, because no other system can meet their needs."

"By patronizing Pool elevators we can speed the day when the co-operative system will be firmly established as the normal method of handling our products."
